

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously presented) A method of conducting an election comprising the steps of:
storing a database of voter records, each voter record comprising at least one voter characteristic,
based on said at least one voter characteristic, generating a paper ballot.
2. (Previously Presented) A method as in claim 1, further comprising the step of:
based on said at least one voter characteristic, determining a set of positions and issues for which a voter is eligible to vote, and generating a paper ballot comprising said set of positions and issues.
3. (Original) A method as in claim 1, further comprising the step of:
marking the voter record associated with said generated ballot as voted.
4. (Previously Presented) A method as in claim 1, further comprising the steps of:
generating said paper ballot comprising a voter associated portion and an anonymous portion, and
mailing said ballot to a voter identified in said voter associated portion, together with an anonymous envelope and a return envelope.

5. (Original) A method as in claim 4, wherein said generated ballot comprises means for separating said voter associated portion and said anonymous portion.
6. (Original) A method as in claim 4, wherein said anonymous portion is adapted to be inserted into said anonymous envelope.
7. (Original) A method as in claim 4, wherein said anonymous envelope is adapted to be enclosed in said return envelope.
8. (Original) A method as in claim 4, wherein said voter associated portion is adapted to be enclosed in said return envelope out side of said anonymous envelope, said anonymous portion is adapted to be enclosed in said anonymous envelope, and said anonymous envelope is adapted to be enclosed in said return envelope.
9. (Original) A method as in claim 8, further comprising the steps of:
receiving said return envelope,
separating said anonymous envelope from said voter associated portion, and marking the voter record associated with the voter identified in said voter associated portion as voted.
10. (Original) A method as in claim 4, wherein said return envelope is addressed to a vote receiving location.

11. (Previously Presented) A system for conducting an election comprising:
- a database adapted to store records for a plurality of voters, each record comprising at least one voter characteristic,
 - a printer adapted to print a paper ballot for at least one voter based on said at least one voter characteristic associated with said voter.
12. (Previously Presented) A system as in claim 11, wherein said printer is further adapted to determine, based on said at least one voter characteristic, a set of positions and issues for which said at least one voter is eligible to vote, and to print said paper ballot comprising said set of positions and issues.
13. (Original) A system as in claim 11, wherein each record comprises a voted field adapted to indicate whether an associated voter has voted.
14. (Previously Presented) A system as in claim 11, wherein said printer is further adapted to print a paper ballot comprising a voter associated portion and an anonymous portion.
15. (Original) A system as in claim 14, further comprising a return envelope and an anonymous envelope.

16. (Original) A system as in claim 15, wherein said anonymous portion of said ballot is adapted to be inserted into said anonymous envelope, and said anonymous envelope is adapted to be inserted into said return envelope.
17. (Original) A system as in claim 14, wherein said voter associated portion is adapted to be separated from said anonymous portion.
18. (Second Amendment) A method of auditing an election, said method comprising the steps of:
- marking each of a plurality of voted paper ballots with a unique ballot identification,
 - scanning said plurality of voted ballots and generating ~~computer-readable visual representations~~ a digital picture of each of said ballots,
 - analyzing markings indicating a voter's intent made on said plurality of voted ballots and generating vote data associated with each of said plurality of voted ballots based on said ~~visual representations~~ digital pictures of said ballots,
 - associating each said ~~visual representation~~ digital picture and corresponding vote data with said voted ballot based on said unique ballot identification.
19. (Original) The method of claim 18, wherein said vote data comprises said unique ballot identification.

20. (Currently Amended) The method of claim 18, further comprising the step of storing said ~~computer-readable visual representation~~ digital pictures and said vote data in a database.

21. (Currently Amended) The method of claim 18, further comprising the step of storing said ~~computer-readable visual representation~~ digital pictures and said vote data in a relational database.

22. (Currently Amended) The method of claim 18, further comprising the steps of:
retrieving at least one of said ~~computer-readable visual representations~~ digital pictures,
displaying said ~~visual representation~~ digital picture and said vote data associated therewith on a display device; and
modifying said vote data associated therewith.

23. (Currently Amended) The method of claim 18, further comprising the steps of:
retrieving at least one of said ~~computer-readable visual representations~~ digital pictures,
displaying said ~~visual representation~~ digital picture and said vote data associated therewith on a display device,
retrieving the voted ballot associated with said ~~visual representation~~ digital picture based on said unique ballot identification, and
modifying said vote data associated with said voted ballot and said ~~visual representation~~ digital picture.

24. (Second Amendment) An election auditing system comprising:

a scanner adapted to generate a ~~computer-readable visual representation~~ digital picture of a voted paper ballot,

a processor adapted to analyze markings indicating a voter's intent made on said voted ballot and generate vote data based on said ~~visual representation~~ digital picture of said ballot,

said ~~visual representation~~ digital picture being associated with said vote data and said voted ballot.

25. (Currently Amended) A system as in claim 24, further comprising a display device adapted to display at least one said ~~visual representation~~ digital picture and said vote data associated therewith.

26. (Original) A system as in claim 24, further comprising a ballot marking device adapted to mark said voted ballot with a unique ballot identification.

27. (Currently Amended) A system as in claim 26, wherein said processor is adapted to associate said unique ballot identification with said vote data and said ~~visual representation~~ digital picture of said voted ballot.

28. (Currently Amended) A system as in claim 24, further comprising a storage device for storing said vote data and said ~~visual representation~~ digital picture of said ballot.

29. (Original) A system as in claim 28, wherein said storage device comprises a database.

30. (Original) A system as in claim 28, wherein said storage device comprises a relational database.

31. (Currently Amended) A system as in claim 28, further comprising a display device, wherein said processor is adapted to retrieve said ~~visual representations~~ digital picture and said associated vote data, and to display said ~~visual representation~~ digital picture and said vote data on said display device.

32. (Currently Amended) A system as in claim 28, wherein said processor is adapted to retrieve at least one of a plurality of records from said storage device, each record comprising vote data and a ~~visual representation~~ digital picture of a voted ballot.

33. (Original) A system as in claim 31, wherein said processor is adapted to modify said vote data.

34. (Original) A system as in claim 26, wherein said processor is adapted to modify said vote data based on a review of the voted ballot associated with said unique ballot identification in said vote data.

35. (Second Amendment) A computer readable medium of instructions for controlling a system to record and audit election results comprising:

a first set of instructions adapted to control said system to generate a ~~computer readable visual representation~~ digital picture of a voted paper ballot, and

a second set of instructions adapted to control said system to analyze markings made on said voted paper ballot and generate vote data from said computer readable visual representation based on said digital picture of said voted ballot, and associate said vote data with said ~~computer readable visual representation~~ digital picture.

36. (Currently Amended) A computer readable medium of instructions as in claim 35, further comprising a third set of instructions adapted to control said system to display at least one said ~~visual representation~~ digital picture and said vote data associated therewith.

37. (Original) A computer readable medium of instructions as in claim 35, further comprising a fourth set of instructions adapted to control said system to mark said voted ballot with a unique ballot identification.

38. (Currently Amended) A computer readable medium of instructions as in claim 37, wherein said fourth set is further adapted to control said system to associate said unique ballot identification with said vote data and said ~~visual representation~~ digital picture.

39. (Currently Amended) A computer readable medium of instructions as in claim 35, further comprising a fifth set of instructions adapted to control said system to store said vote data and said ~~visual representation~~ digital picture in a storage device.
40. (Original) A computer readable medium of instructions as in claim 39, wherein said storage device comprises a database.
41. (Original) A computer readable medium of instructions as in claim 39, wherein said storage device comprises a relational database.
42. (Currently Amended) A computer readable medium of instructions as in claim 39, further comprising a sixth set of instructions adapted to control said system to retrieve at least one record from said storage device, said record comprising a ~~visual representation~~ digital picture of a voted ballot and vote data associated with said ~~visual representation~~ digital picture and said voted ballot.
43. (Original) A computer readable medium of instructions as in claim 42, further comprising a seventh set of instructions adapted to control said system to receive an input, and modify said vote data based on said input.
